

NFL Tie Breakers

Head-to-head: Who has the best record in head to head matchup(s)

Divisional Record: Best won-lost-percentage in games in the division. For our sim, we are currently omitting ties (could be changed) so we only need to worry about total # of wins

Common games: Most wins between opponents shared on both schedules (minimum of 4).

Conference games: Most wins in games within the conference

Strength of Victory: Combined winning percentage of teams beaten

Strength of Schedule: Combined winning percentage of all teams played

Best Points For/Points Against Combined Ranking (Conference): Looks at who has the lowest combined ranking within conference

Best Points For/Points Against Combined Ranking (Overall): Looks at who has the lowest combined ranking within the whole league

Combined Ranking Explained: Every team in the conference/league is ranked based on their total Points For and their total Points Against. These are then added up to get a “combined ranking score”. Let’s say Team 1 is 3rd in Points Against but 12th in Points For. They would have a score of 15. Now let’s say Team 2 is 6th in Points For and 8th in Points Against. This would give them a score of 14, beating out Team 1 in this tie breaker.

Best Net Points (Common Games): Total points for minus total points against within common opponents

Best Net Points (Overall): Total points for minus total points against

Best Net Touchdowns: Total touchdowns scored minus total touchdowns given up

Coin Toss: You know the drill
